

Plan 54 Hybrid Slurry Seal Support Systems

Features:

- Provides a cool, clean, pressurized barrier fluid to a dual pressurized seal
- Forced Circulation with high pressure circulation pump
- Design modularity with high end instrumentation for ease of control.
- Plug & play system.

Specification:

- Design pressure: 25 bar
- Test pressure: 45 bar
- Working volume : 12 liters
- Material : SS316

Note:

Being hybrid allows this to be customised base on application requirement.
